

Computer Knowledge

The software used to drive microprocessor-based systems is called:

- (A) assembly language programs
- (B) firmware
- (C) BASIC interpreter instructions
- (D) flowchart instructions

Ans . A

A program -

- (A) is a sequence of instructions
- (B) is the device where information is stored
- (C) is a device that performs a sequence of operations specified by instructions in memory
- (D) none of these

Ans . A

In an absolute loading scheme, which loader function is accomplished by programmer?

- (A) Linking

(B) Allocation

(C) Both (a) and (b)

(D) Reallocation

Ans . C

Specialized program that allows user to utilize in specific application is classified as

(A) relative programs

(B) application programs

(C) relative programs

(D) replicate programs

Ans . B

Examples of system programs includes

(A) operating system of computer

(B) trace program

(C) compiler

(D) all of above

Ans . D

Translator for low level programming language were termed as

(A) Assembler

(B) Compiler

(C) Linker

(D) Loader

Ans . A

The translator which perform macro expansion is called a

(A) Macro processor

(B) Macro pre-processor

(C) Micro pre-processor

(D) Assembler

Ans . B

A program in execution is called

(A) Process

(B) Instruction

(C) Procedure

(D) Function

Ans . A

When referring to instruction words, a mnemonic is:

(A) a short abbreviation for the operand address

National Health Mission Bihar

(B) a short abbreviation for the operation to be performed

(C) a short abbreviation for the data word stored at the operand address

(D) shorthand for machine language

Ans . B
