We are a research group in the Indian Institute of Technology, Madras, working under the guidance of professor Raghunathan Rengaswamy, department of chemical engineering. We are a team of Ph.D. scholars and undergraduate students at IITM. The group is working on environmental monitoring with the potential to transform into a startup shortly.

Responsibilities:

We are looking for an experienced full-stack engineer to implement both back-end and front-end software solutions. The position entails working in an agile team to develop React-based projects that support our system.

- Design, implement and test full-stack solutions using React and Node.js
- Design robust systems that can support multiple users
- Work alongside other team members to integrate various components into finished products
- Continuously create new and interactive features that would help to improve user experience and user engagement.
- Assist with troubleshooting of issues as needed
- Participate in the design and architecture of software solutions

- Assist in developing and maintaining continuous integration pipelines

Minimum Qualifications:

Our tech stack currently includes AWS, Python, React.js, Node.js, Linux, Node-RED, MongoDB, Flutter, Flask. You will be best qualified if you have experience with several (not all) of the above.

- Ability to translate user experience design (mock-ups, wireframes and user journeys) into code using CSS and popular frontend frameworks
- Ability to develop robust and scalable backend services defined by RESTful APIs in Python
- Familiarity with Cloud/ SaaS architectures and how to build secure and maintainable services
- Strong understanding of unit testing, design patterns and usage of Devops tools
- Experience with source control and continuous integration tools
- Worked in an Agile multi-functional team

The last date for submission of online application is 21.07.2022

General Instructions to the candidates
